

PROJECT PROPOSAL REQUIREMENTS

Field	Details
Date	19 August 2026
Team ID	Individual
Project Title	Global AI Adoption in Education
Maximum Marks	3 Marks

Project Proposal

Project Overview	Details
Objective	To analyse global AI adoption in education and identify trends in AI usage among students, teachers, schools, and different regions using Tableau dashboards.
Scope	The project covers analysis of AI adoption across countries/regions, student and teacher usage, rural and urban adoption, popular AI tools, and adoption trends. The analysis is presented through interactive Tableau visualizations.
Problem Statement	Education stakeholders lack a simple and interactive way to understand global AI adoption patterns and compare AI usage across regions, students, teachers, and educational environments.
Impact	Understanding AI adoption can help education stakeholders identify adoption gaps, compare regions, understand usage patterns, and make better decisions regarding AI implementation and digital education resources.
Approach	The dataset will be collected, cleaned, prepared, and analyzed using Tableau. Different charts, KPIs, filters, and dashboards will be created to identify important patterns and trends in AI adoption.
Key Features	Interactive Tableau dashboard, KPI cards, country/region analysis, student vs. teacher comparison, rural vs. urban analysis, AI tool analysis, trend analysis, filters, and key insights.

HARDWARE

Resource Type	Description	Specification / Allocation
Computing Resources	Laptop/Desktop used for data analysis and Tableau development	1 Laptop
Processor	Processor required for running Tableau and data analysis tools	Laptop processor
Memory (RAM)	RAM required for Tableau, dataset processing, and analysis	8 GB RAM or higher
Storage	Storage for dataset, Tableau workbook, and project files	SSD with sufficient free space
Display	Screen required for creating and reviewing Tableau dashboards	Laptop display
Internet	Internet connection for downloading datasets, Tableau resources, and updates	Internet connection

SOFTWARE

Resource Type	Description	Specification / Allocation
Data Visualization Tool	Used to create interactive dashboards and visualizations	Tableau Desktop / Tableau Public
Operating System	Operating system used to run Tableau and other project tools	Windows
Data Format	Dataset format used in the project	CSV
Project File	Tableau project/workbook file	.twbx
