

Data Collection and Pre-processing Phase

Field	Details
Date	19-Aug-2026
Team ID	Individual
Project Title	Global AI Adoption in Education
Maximum Marks	2 Marks

Data Collection Plan

Section	Description
Project Overview	The project aims to analyse global AI adoption in education using Tableau and identify patterns in AI usage among students, teachers, schools, and different regions.
Data Collection Plan	The data will be collected from the Global AI Adoption in Education dataset provided for the project. The dataset will be examined, cleaned, and prepared before being connected to Tableau for analysis.
Raw Data Sources Identified	The primary raw data source is the Global AI Adoption in Education dataset in CSV format. It contains information required for analysing AI adoption, usage patterns, regions, AI tools, and education-related indicators.

Raw Data Sources

Source Name	Description	Location/URL	Format	Size	Access Permissions
Global AI Adoption in Education Dataset	Dataset containing information about AI adoption and usage in the education sector, including students, teachers, regions, AI tools, and adoption trends.	Project-provided dataset	CSV	Project dataset size	Public / Project-provided
